## EDUCATION

2023

- Microsoft AZ 204 Azure Developer Certificate 2023

2015

EPN

- Computational and Informatic system Engenieer

## SKILLS

- Frontend:** React, React Native, Next.js, Tailwind, Material UI, Styled Components
- Backend:** Node.js, Express.js, Prisma, MySQL, PostgreSQL
- Testing:** TDD, BDD, Jest, Playwright, Mocha, Chai
- Architecture & Design:** Design Systems, Web Components, UX Collaboration
- Containers:** Docker
- Methodologies:** SCRUM, XP, Gitflow
- Languages:** Spanish (native), English (advanced), German (intermediate), French and Italian (basic)

## PROFILE

Software developer with over 6 years of experience in web and mobile development. Specialized in React, React Native, Next.js, and TypeScript. Experienced in leading design system teams, developing digital products for banking, startups, and tech companies, and collaborating on automation and AI-based projects. Passionate about building accessible user experiences, scaling products, and working in agile and collaborative environments.

## WORK EXPERIENCE

Exit83

JUN 2022 - NOWADAYS

### Software Consultant

- Designed and developed full-stack applications for clients in LATAM and the US using React, Next.js, and TypeScript.
- Led UI/UX strategy for custom dashboards and admin panels with responsive design and accessibility in mind.
- Automated end-to-end test flows using Puppeteer and Playwright to ensure app reliability and deployment confidence.
- Built and integrated backend APIs using Prisma with MySQL/PostgreSQL, improving data consistency and development speed.
- Participated in architecture design, CI/CD workflows, and Agile sprint planning.

- **Projects included:**

- USTA (US Open Ticket Management): Developed a ticket management platform for the US Open using Express.js, Next.js, Docker, prisma JS all over typescript.
- CORNERSTONE SEPTEMBER: Professional Employer organization platform, that handle's employees and payrolls all over the 50 US states. The technologies used are: Express.js, Next.js, Docker, prisma JS all over typescript.
- MEDIARY: App and Web platform to record, process and resume notes using AI from medical interviews using API and HIPPA compliant. The technologies used are: Express.js, Next.js, Docker, prisma JS all over typescript, and React Native.
- EXIT 83 Home Page: Internal project and home page using Strapi V4 to generate the backend content manager, Express JS and React to deploy content generated in the backend strapi manager.
- VETTX V4 AND V5: Car dealership software to buy cars directly from customers. I was developing the best solutions to bind customers and dealers. (Web project, Chrome extension, and data extraction tools). The team organization included 3 developers, one quality assurance, the UI/UX expert, the scrum master, and the product owner. My role was full stack developer with typescript, also monitoring the data extraction tool in azure portal.
- OPTIMUM ENERGY: Air conditioning systems control the web platform using Next JS to develop a canvas solution to check the air conditioning map in hospitals, for communication with the client using web socket communication. The team was 2 developers, the scrum master and the product owner

## **BANCO PICHINCHA**

Jun 2019 – Jun 2022 | Ecuador

### Frontend Lead & React Native Developer

- Technical lead for mobile and web design system.
- Led the frontend development of deUna app using React Native and TDD.
- Coordinated team collaboration and continuous product improvement.
- **Projects:**
  - MOBILE DESIGN SYSTEM: Components library done to manage and standardize styles, experiences and designs across Banco Pichincha organization
  - WEB DESIGN SYSTEM: Components library done to manage and standardise styles, experiences and designs across web applications Banco Pichincha organization.
  - DEUNA WALLET: React Native App to make easy payments and charges for small and medium Pichincha Business clients.

## STACK BUILDERS

Mar 2018 – May 2019 | Ecuador

### Software Developer

- Web development with a focus on best practices, testing, and pair programming.
- Applied agile methodologies and product-oriented development.
- **Projects:**
  - GOCARO: MVP to buy cars and make cars selling campaigns in the US. Using typescript in all the application, Node JS, Express, Postgres and React JS with material UI components, Jest, Mocha, Chai for testing and BDD approach.
  - KINDERCHART: Parental control of children's behavior, app for helping children achieve their goals, developed in react native for the frontend and typescript
  - SKRETTING INTELLIGENCE CENTER: Creation of a production control center of shrimp ponds management, using React JS and typescript for the frontend part, Jest for unit testing and snapshot testing.
